ABOUT THE CAN MANUFACTURING AND PROCESSING COURSE

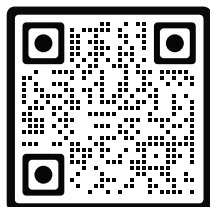

The Silgan Containers Technical Services team will provide top-notch training on crucial aspects of can manufacturing and canning processes, including double-seam evaluation and diagnosis. This workshop features daily hands-on lab sessions and a complimentary social event at the Triptych Taproom.

COURSE OVERVIEW

- › **Can Manufacturing 101:** Provide background on manufacturing processes.
- › **Canning 101:** In-depth discussion from receiving cans to labeling and shipping.
- › **Double Seam Evaluation:** Training to develop skills necessary to evaluate the integrity of double seams and their importance to food can safety.
